
Mule Deer in Sahaurita Area

Posted by Rcheree Nut - 2008/08/26 22:33

Hey guys...do any of you know where to hunt Mule deer in the Sahuarita Area? I've seen some but not a lot in the Santa Rita Experimental range but I am looking for a high number of deer. I usually hunted the Reddington Area and took some nice muleys out of there but since I moved the drive is much too far for an afternoon or morning hunt.

Thanks

Phil

I have seen some muleys across the interstate off the Arivaca highway...maybe ten miles west of the interstate. This is less than 30 minutes from Sahuarita. There are some great whitetails on the east side of I-19 and they are more numerous south of Tucson.

Good luck!

Nathan
